PROFILE

QA Automation Engineer with **7+ years of experience** in UI, API, and Performance Testing, specializing in Playwright, Selenium, REST Assured, JMeter, and Gatling. Experienced in building and maintaining automation frameworks, CI/CD integration, quality gate implementation, production issue analysis, and test coverage improvement. Proficient in Google Analytics (GA4), Google Tag Manager, Kibana, Argo CD, Akamai, Contentful, and AI-driven test automation, with a strong understanding of Agile methodologies and cross-functional collaboration.

SKILLS

Automation Tools	Programming Languages	Frameworks	CI/CD & Version Control
- Selenium WebDriver - Playwright - Rest Assured - Postman - Gatling - Jmeter	- Java - JavaScript - SQL	- TestNG - Cucumber BDD - Maven - Allure - Extent Reports	- Jenkins - Azure DevOps - GitLab - Perforce

PROFESSIONAL EXPERIENCE

Electronic Arts [via Adecco], Senior QA Automation Engineer / SE II Nov 2023 – Present | Hyd, India

- Designed, developed, and executed comprehensive **test strategies** covering **UI, API, Functional, Regression, Smoke, Sanity, and End-to-End (E2E) testing** across multiple releases.
- Built and maintained scalable UI and API **automation frameworks** using **Playwright (JavaScript)**, automating **500+ test cases** and cutting regression execution time through parallelized runs.
- Designed and conducted **performance and load testing** using **Gatling**, validating stability for **1,000+ concurrent virtual users** and identifying critical bottlenecks before production.
- Designed, executed, and validated **200+ REST API test scenarios** using **Postman** and **Swagger/OpenAPI** across integrated services.
- Integrated automated test suites into **GitLab CI/CD pipelines**, enabling **continuous quality gates** on every deployment and reducing manual validation effort.
- Conducted **production issue analysis** using **Kibana** and validated deployments through **Argo CD**, resolving **100+ production issues** with development teams.
- Validated **Google Analytics 4 (GA4)** events, **Google Tag Manager (GTM)** configurations, **SEO metadata**, and **Google indexing** for accurate analytics implementation.
- Designed and executed validation of **Rate Limiting, IP Throttling, and DDoS protection** mechanisms to ensure application resilience.
- Developed **Skill Markdown (Skill MD)** files to guide **AI agents** for automated **code generation**, reducing repetitive scripting effort.
- Tested and validated **AI agent self-healing** capabilities, improving automated test recovery and reducing maintenance effort.
- Validated **Retrieval-Augmented Generation (RAG)** search and summary models across **300+ scenarios**, improving response quality and knowledge grounding.
- Validated **Akamai Edge Redirect Policies** — locale routing, URL rewrites, and redirect rules — across **10+ locales** and multiple environments.
- Verified **Redis** session management, **cache invalidation**, and entitlement consistency across authenticated user workflows.
- Tested **Contentful CMS** across **5+ environments**, ensuring content publishing, localization, and cache synchronization.
- Utilized **Perforce** for version control, managing code across multiple parallel feature branches and supporting Agile development.

Wipro Limited, Software Engineer

Mar 2022 – May 2023 | Hyd, India

- Conducted manual API testing using **Postman**, validating **300+ REST API endpoints** across multiple releases.
- Developed **100+ Early Integration Testing (EIT)** automation scripts using **Selenium and Java**, enabling earlier defect detection and reducing integration issues by **30%**.
- Created and executed **150+ System Integration Testing (SIT)** scripts, ensuring end-to-end API validation across integrated systems.
- Uploaded and maintained **500+ test execution reports** and documentation in **PractiTest**, improving project visibility and traceability.
- Performed **Google Cloud Platform (GCP)** database validation, ensuring data accuracy and consistency across applications.

Tecra System Pvt Ltd, QA Engineer

Oct 2018 – Jan 2022 | Hyd, India

- Developed and implemented **150+ automated BDD test cases** using **Selenium and Java**, increasing automation coverage by **65%**.
- Utilized **Maven and Git** to manage project dependencies and source code, improving build consistency and team collaboration.
- Created **100+ detailed Extent Reports**, providing actionable insights into test execution and defect trends.
- Supported performance testing by developing and analyzing **50+ JMeter load test scripts**, validating system reliability under high user loads.

PROJECTS

ACCUCONNECT, AUSTIN TEXAS, USA , Tecra System Pvt Ltd

AccuConnect makes individual communication possible in mass print campaigns. We offer an easy-to-use process for collaborating among businesses, printers, marketers salespeople, and executives.

AUSPOST, MELBOURNE, VICTORIA, AUSTRALIA , Wipro Limited

Australia Post provides reliable and affordable postal, retail, financial and travel services.

POGO, REDWOOD CITY, CALIFORNIA, USA , Electronic Arts

For nearly 25 years, Pogo™ has led the way in casual online gaming with over 50 games in a variety of categories and themes. you'll be entertained forever with our web games - no downloads necessary!

EA HELP, REDWOOD CITY, CALIFORNIA, USA , Electronic Arts

Official support website for EA games, accounts, purchases, and technical issues.

EDUCATION

Bachelors of Technology | ECE, H.I.T.A.M

Jun 2014 – Aug 2018 | Hyd, India

EVENTS AND HACKATHONS

National workshop on "Nano Satellites - Future of Space Science", IEEE Communications Society

The Dittofi / No-Code Campus Hackathon, Let's Hack Rwanda, Dittofi

Built a full-stack web application on a no-code platform during a 24-hour hackathon, competing in an international campus challenge.

MetLife HACK4JOB 2025 - Hyderabad

MetLife Hack2Hire - Participated in a technology hiring hackathon involving coding challenges and real-world problem-solving, demonstrating software testing and analytical skills
